View-Consistent 3D Editing with Gaussian Splatting

Yuxuan Wang, Xuanyu Yi, Zike Wu, Na Zhao, Long Chen, Hanwang Zhang
European Conference on Computer Vision (ECCV), 2024

- In the diffusion model, we proposed effective multi-view consistency modules that harmonize the inconsistent multi-view image guidance by integrating with 3D Gaussian Splatting (3DGS) characteristics,
- We incorporated our consistency modules into an iterative pattern that offers high-quality 3DGS editing.

Improving Scene Graph Generation with Relation Words' Debiasing in Vision-Language Models

Yuxuan Wang, Xiaoyuan Liu
Submitted to ACM MM, 2024

- We introduced a plug-and-play method that dynamically ensemble the zero-shot VLMs to address the under-representation issue in Scene Graph Generation (SGG) models.
- Towards the relation words bias underlying in the pre-training language set, we propose Lagrange-Multiplier Estimation to approximate the unattainable pre-training words' distribution.

GEB+: A Benchmark for Generic Event Boundary Captioning, Grounding and Retrieval

Yuxuan Wang, Difei Gao, Licheng Yu, Stan Weixian Lei, Matt Feiszli, Mike Zheng Shou
European Conference on Computer Vision (ECCV), 2022

- We introduced three tasks of video boundary understanding on our new dataset called Kinetics-GEB+ (Generic Event Boundary Plus), consisting of over 170k boundaries associated with captions in 12K videos.
- We designed a new Temporal-based Pairwise Difference (TPD) Modeling method for visual difference representation and achieved significant performance improvements.

AssistSR: Task-oriented Video Segment Retrieval for Personal AI Assistant

Stan Weixian Lei, Difei Gao, **Yuxuan Wang**, Dongxing Mao, Zihan Liang, Lingmin Ran, Mike Zheng Shou
Findings of EMNLP, 2022

- We introduce a new dataset and a new task called Affordance-centric Question-driven Video Segment Retrieval (AQVSR), aiming at retrieving affordance-centric instructional video segments given users' questions.
- To address the task, we developed a straightforward model called Dual Multimodal Encoders (DME).

Symbolic Replay: Scene Graph as Prompt for Continual Learning on VQA Task

Stan Weixian Lei, Difei Gao, Jay Zhangjie Wu, **Yuxuan Wang**, Wei Liu, Mengmi Zhang, Mike Zheng Shou
AAAI Conference on Artificial Intelligence (AAAI), 2023, *Oral*

- We introduced Scene Graph as Prompt (SGP) for symbolic replay, a real-data-free replay-based method for Continual Learning VQA.
- SGP overcomes the limitations of replay-based methods by leveraging the scene graph as an alternative to images for replay.
